
CURB

Amanda Wang and Edward Lin

The Problem

- Waste
 - People throw things away when they move out
 - Difficult and expensive to move in
 - No easy way for people to give things away quickly
-

Existing Solutions

- There are already platforms that exists
 - Ebay
 - Craigslist
 - Goodwill
 - Students at USC make use of Reddit and Facebook groups
-

Our Solution

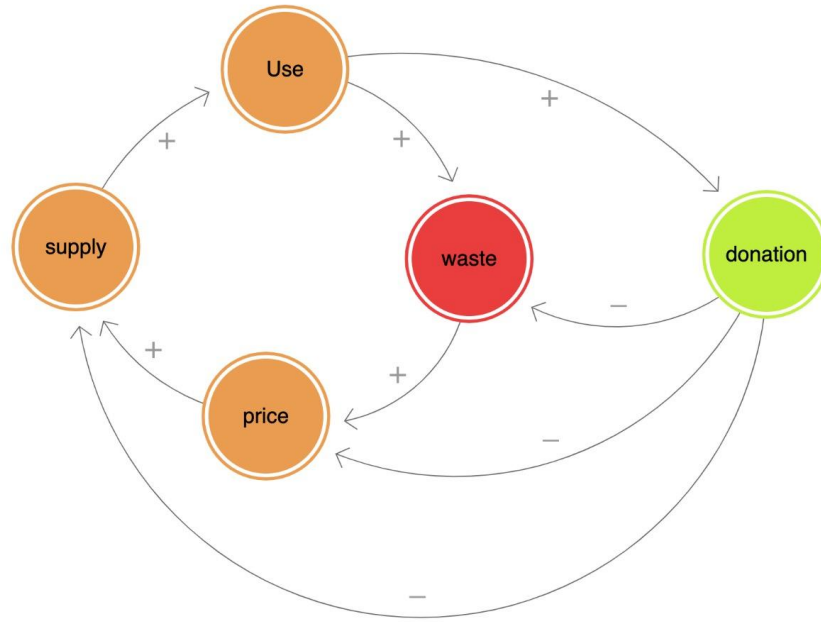

- A web app that allows users to find others that are willing to take things off their hands
 - One centralised platform
 - Provide organisation to allow users to easily find what they are looking for
-

Our Advantage

- Build-in trust with USC community
 - Centralized location + fryft
 - Students are moving in and out every semester/year
 - Wants free/cheap items
 - Wants to move out fast
 - Wants to move in fast
-

Systems

Donation & Recycling of Items

Technical Details

- Single-page application
 - Front-end
 - HTML/CSS, Javascript
 - Back-end
 - Firebase authentication
 - Firebase realtime database
-

User Feedback

- Safety
 - Pickup locations
 - Reliability
 - Rating system
 - Reporting
 - User experience on platform
 - Filter by dates
 - Filter by categories
-

Biggest Challenge

- Finding users
 - Our platform is very dependent on having an existing pool of users
 - Reached out to friends
 - Market towards areas with high concentration of potential users
 - Streets with student housing
 - USC village house (sophomores who will move out of dorms)
-

Next Steps

- Acquire USC users
 - Expand to a couple other schools
 - Streamline user experiences
 - Help user find the items they need fast
 - Implement rating for sellers & buyers
 - Algorithm to provide more relevant items
-
